

# THE ULTIMATE WICK

- Continuous working temperature 2300 degrees F.
- Melting point 3200 degrees F.
- Replaces asbestos products which are limited in use to 1200 degrees F.
- No known chronic health effects, as extracted from USA. Material Safety Data Sheets [MSDS]
- Structure is such that material can be flaired out similar to asbestos, thus improved combustion.

## Instructions

- Unwind the three major strands.
- Carefully separate to expose smaller ones.
- Cut to desired length and place in burner tubes, DO NOT PACK TIGHTLY, material should just be retained in tubes when burner is inverted.
- Spread out similar to a flower arrangement.
- GOOD STEAMING.
